

**MODULAR PACKAGED UNIT**

# THE MOST EFFICIENT APPROACH TO MAKE-UP AIR

RuppAir's Modular Packaged Unit (MPU) is a factory packaged air conditioning and heating unit for 100% outdoor air applications, providing sensible cooling and highly efficient heating.

### EXCEPTIONAL EFFICIENCY

- High efficiency nominal 14 SEER rating condensers
- Comfortable outdoor air temperatures are left untempered, reducing energy costs
- Multiple cooling stages provide partial cooling capacity when needed, allowing for lower energy consumption
- Can be paired with various highly efficient heating options to reduce operating costs

### EASY INSTALLATION

- Condenser units are top-mounted, requiring no additional footprint space
- Pre-charged and factory assembled; no field piping or wiring required
- Modular housings allow for easy installation of V-banks, mixing boxes, and intakes

### SUSTAINABLE DESIGN

- Standard G90 galvanized steel construction
- Outdoor coil hail guards
- Designed to operate in a variety of ambient conditions
- Backed by an industry leading warranty program

### MULTIPLE OPTIONS

- AC-MPU for lower CFM/ton of cooling
- Warm liquid reheat for cooling and dehumidification
- Heat pumps for light heating capacities when gas heat is unavailable
- Single point connections to reduce roof penetrations and simplify wire runs
